Towards a sustainable and better future

With over 10 000 accesses to our articles in 2023, our online journal platform https://www.hkjo.hk/ has, on its 8th anniversary, reached a major milestone. We are pleased that our aims of expanding the readership and profile of our journal[1] have been attained. In the smartphone era, readers can easily access our articles anytime, anywhere. To ensure proper preservation of articles, we have recently subscribed to the digital preservation service—Portico.

In contrast, storing and retrieving a print copy of our journal may be less convenient and accessible. With the collective responsibility to reduce environmental impact, the editorial board would like to offer our readers the option to opt out of receiving a print copy, beginning from 2024. Please kindly fill in an online form via the below QR code. We would like to thank our readers for their understanding and support of our sustainability initiatives.

We also wish to remind our trainees (who enter training after 1 January 2020) of the publishing requirement. Trainees are required to publish a first-authored paper before sitting for the part D examination. The *Hong Kong Journal of Ophthalmology* is one of the eligible venues for publishing your work. Furthermore, with generous support from the College and the Timothy Liu Kai Ching Memorial Fund, original articles published in our journal shall be candidates for the prestigious *Hong Kong Journal of Ophthalmology* Best Original Article Award.

On behalf of the editorial board, may we wish all readers a happy, healthy, and successful year in 2024.

Dr Au Ka Hong, MHM (UNSW), FHKAM (Ophthalmology); Dr Yam Cheuk Sing Jason, MD (CUHK), FHKAM (Ophthalmology)

Online form for opt-out of print copy	
	By opting out of the print copy, you will no longer receive the print copy via mail. Instead, you will receive an email notification with a link to access the online version and CME questions when a new issue is published.
